Zoning Use Permit Estimate (City)	\$175.00
Total Initial Cost	\$5,748.37

Your fee estimates have been finalized. Please note that the City reserves the right to modify fees based on additional staff determination.

Product features

Intuitive zoning maps

The zoning maps reveal where the project is permitted, conditionally permitted, and prohibited. These clearances take into account conditional considerations, such as whether a restaurant will serve alcohol, or offer drive-through service.

Automatic permit scoping

Nested questions quickly surface permit requirements. Location data can also be leveraged for triggering permit requirements (i.e. zoning permits, business improvement and parking districts, environmental overlays, etc).

Real-time fee calculation

Fees are calculated in real-time as applicants enter project details. A unique feature in the marketplace, OpenCounter can run fee estimations across departments and data sets. Digitizing the fee schedule also provides unprecedented analytics.

Mobile Friendly

All our products feature responsive design, making them friendly on all screen sizes and mobile devices.

Cloud-hosted SaaS

Our service is hosted at U.S. data centers, ensuring Patriot Act and Freedom of Information Act compliance.

Secure & Encrypted

Served over SSL, encrypted-at-rest, and backed up to a ISO 27000/SOC 1 and SOC 2/SSAE 16/ISAE 3402 data facility.

Localization available

The Business Portal can be fully translated into your choice of 36 languages.
